LAKE TAHOE.

The Summer Rush of Tourists Already Commenced.

A Sacramento correspondent sends the following:

People are flocking to all parts of the Lake, like bees around a sugar barrel. The season will be four weeks earlier than last year. The snow has all disappeared from the Lake shores.

Already there is as much travel as last year in June.

Captain Todman is preparing to begin daily trips by the 18th of this month. Oh, yes, we look for large crowds here this season. It has been many years since people saw as dull a season as last.

Bailey will be here by the 18th, a month sooner than last year, and no doubt will bring tourists enough to fill one-half the hotel. Mr. Burton is now giving it a fresh coat of paint.

More of Zirn's Strike.

The Genoa Courier has the following:

Wm. Zirn is exhibiting specimens of decomposed quartz, lousy with gold, taken from his claim northeast of Peter Anderson's ranch in Pine Nut. Otto Schulz, of Carson, has been prospecting with great perseverance for several years and we hope he has struck a ledge that will reward him for his labor. It is stated that some of the assays have gone as high as \$63,000 a ton. A few tons of this ore would satisfy an ordinary newspaper man.

Zirn was in town yesterday and said, "I have the California Bank in my pocket." The specimens he showed here and in Carson were knocked off the surface cropping of what he claims is an immense ledge. He claims that he scraped up two pans of dirt from around the ledge and it turned out about one dollar in gold. Zirn had formerly taken out a large quantity of what he claims is rich ore at a point seven hundred feet from where he secured the rich specimens.

For years gold rock has been found in Red Canyon and Pine Nut and one of these days the mother ledge will be brought to light. The wonder is that capitalists have not taken hold and hastened the development.

Hera Silver Mining Company.

The Austin Bennett says: This company, admitted to be the second strongest mining corporation on the American continent, has just declared its twenty-first dividend, amounting to \$50,000, with a net cash balance of \$274,908 15. The only property operated by them in this section is the Alexander mines, located at Grantville, and have had employed for the past two years about twenty miners developing it in a systematic manner, whose toils are about to be rewarded handsomely. These mines once employed four hundred men, and during the management of San Pedro, produced somewhere in the neighborhood of \$2,000,000. P. T. Farnsworth, of Salt Lake, is Superintendent of the mammoth institute, who expressed himself as being well pleased with the aspect when here about four weeks ago.

A Challenge.
